### MIZUNO'S MP-5 IRONS

Mizuno's MP-5 irons (\$999/steel, \$1099/graphite) combine muscleback control with a cavity back design. A thick area behind the impact zone enhances feel. The channel back design progresses through the set – with more weight low in the long irons for a loftier launch and high in the short irons for a penetrating flight.

### DST'S COMPRESSOR GOLF CLUB TRAINING DEVICE

DST's Compressor golf club training device (\$100/club) forces you to locate and consistently return to the optimal impact position. Offered in wedge and 8-iron models, the aid leads you to a delayed strike in which your hands lead the clubface through impact. That helps you maintain control over the clubface until after it's struck and compressed the ball. The result: Distance and accuracy.

### SUN MOUNTAIN'S 2.5 STAND BAG

Sun Mountain's 2.5 Stand bag (\$229) has an 8.5-inch top with four full-length dividers, allowing it to hold 14 clubs without clanking. The dual strap and hip pad enhance shoulder and side comfort. A full-length clothing pocket and carbon fiber legs add quality.

### CALLAWAY'S GREAT BIG BERTHA DRIVER

Callaway's latest Great Big Bertha driver (\$450) is long, forgiving and consistent, and feels nice and crisp at impact. It's easily adjustable for loft, lie angle, draw/fade and weighting to help you find your perfect ball flight. A thin face, aerodynamic clubhead shaping and use of multiple materials all contribute to distance.
