**DST Golf's Compressor Used by Winner and Top Finishers at The Barclays**

***Renowned Warm-up Club Trusted by More 275 Professional Tour Players***

**(SALISBURY, England)** – [DST Golf](http://DSTGolf.com) – developer and manufacturer of ground breaking warm-up clubs that benefit players of all skill levels – confirms the winner and three of the top-five finishers at The Barclays, the first leg of the 2015 FedExCup, utilized DST Golf's Compressor in preparation for tournament play.

Featuring a scientifically-curved shaft and amended sole angle, the Compressor helps professionals and amateurs alike improve shot consistency by allowing them to locate, train and perfect the Optimal Impact Position. Since debuting earlier this year, the warm-up clubs have developed a dedicated following of over 275 professional Tour players, including eight tournament winners in the past two months.

"Each week we see the incredible feats these players perform on the course, but we rarely get a glimpse into how much time they dedicate to practice, a crucial element to their success," says Bertie Cordle, founder and CEO of DST Golf, "Our warm-up clubs are the ideal tool to help players of any skill level hone ball striking before a round, to ensure great results on the course."

Popular also among more than 60 top-ranked swing coaches, the curved shaft of the Compressor is engineered to replicate the shape of a normal shaft in the optimal impact position. This unique design helps golfers learn how to control the club face through impact and compress the ball, which leads to improved consistency, control and accuracy. Additionally, the club's "Hand Position Alignment Marker" ensures players replicate the optimal impact position at set-up, thus simplifying the swing and ingraining the muscle memory needed to consistently achieve this scientifically-proven ideal position.

Developed by a former European Challenge Tour player after years of research on the biomechanics of impact, the DST Compressor teaches the golfer two things: how to swing the club on plane and how to maintain tension in the shaft until after impact. These are the two critical aspects to achieve better ball striking, control, consistency and accuracy.

**About DST Golf**

Based in Salisbury, England, DST Golf was founded by former European Challenge Tour player Bertie Cordle in 2013. Cordle taught at a number of top flight golf academies in the UK, Portugal and Germany and spent 3 years studying the biomechanics of ball striking, which culminated in the design and development of DST Golf's patent pending technology. DST Golf clubs are recognized as an Approved Product by the PGAs of Europe.
