DST Golf's Compressor Trusted by World's No. 1 Ranked Golfer

Revolutionary Warm-up Club Now Used by More Than 300 Professional Tour Players

(SALISBURY, England) – [DST Golf](http://DSTGolf.com) – developer and manufacturer of ground breaking warm-up clubs that benefit players of all skill levels – confirms the winner of the BMW Championship and new No. 1 ranked golfer in the world, along with five other top-10 finishers, relied on DST Golf's Compressor to help prepare for tournament play.

This week, 14 out of the 30 TOUR Championship contenders count among the more than 300 professionals who train with DST Golf clubs. Featuring a scientifically-curved shaft and amended sole angle, the Compressor helps professionals and amateurs alike improve shot consistency by allowing them to locate, train and perfect the Optimal Impact Position. The club has become extremely popular with the world's best players.

"This young Australian superstar realizes that success starts on the driving range and works tirelessly to hone his game for tournament play," says Bertie Cordle, founder and CEO of DST Golf. "The Compressor allows golfers to feel the proper hand and body alignment to ensure they reach the Optimal Impact Position in order to compress the ball with every swing."

Popular also among more than 60 top-ranked swing coaches, the curved shaft of the Compressor is engineered to replicate the shape of a normal shaft in the optimal impact position. This unique design helps golfers learn how to control the club face through impact and compress the ball, which leads to improved consistency, control and accuracy. Additionally, the club's "Hand Position Alignment Marker" ensures players replicate the optimal impact position at set-up, thus simplifying the swing and ingraining the muscle memory needed to consistently achieve this scientifically-proven ideal position.

Developed by a former European Challenge Tour player after years of research on the biomechanics of impact, the DST Compressor teaches the golfer two things: how to swing the club on plane and how to maintain tension in the shaft until after impact. These are the two critical aspects to achieve better ball striking, control, consistency and accuracy.

About DST Golf

Based in Salisbury, England, DST Golf was founded by former European Challenge Tour player Bertie Cordle in 2013. Cordle taught at a number of top flight golf academies in the UK, Portugal and Germany and spent 3 years studying the biomechanics of ball striking, which culminated in the design and development of DST Golf's patent pending technology. DST Golf clubs are recognized as an Approved Product by the PGAs of Europe.
